January 2022

#### Full Stack Developer SToR

- Reviewed code, debugged problems, and corrected issues.
- Participated in requirements gathering to solidify prerequisites and determine the best technical solution to meet business needs
- Boosted network, system, and data availability and integrity through preventive maintenance and upgrades.
- Discussed project progress with customers, collected feedback on different stages, and directly addressed concerns.
- Used NodeJS and SQL/No-SQL to develop and manage databases.
- Coordinated efficient large-scale software deployments.
- Managed development milestones from initial steps through final delivery.
- Developed unit test cases for testing and automation.
- Developed functional databases, applications, and servers to support websites on the back end.
- Worked on tested Easy authentication with Google and Facebook

April 2022 -  
Till Date

#### Frontend Developer Leeway

Verified Front-end code functionality across browser and platforms  
Collaborated with web content editors to facilitate website maintenance  
Fielded stakeholder questions and translated technical jargon into simplified concepts  
Created clean, well-documented custom code and updates  
Worked closely with back-end developers to troubleshoot and resolve coding issues  
Renewed domain name registrations

Backed up files from websites to local directories for instant recovery  
Communicated with network personnel and web site hosted agencies to address hardware and software issues affecting Web sites  
Installed and configured hypertext transfer protocol (HTTP) servers and associated operating systems  
Consistently met my short and long-term targets.  
Handled customer complaints with empathy and composure.  
Proactively participated in meetings and helped create new practices.
